PREFACE.

In presenting to my customers and the public, this edition of Fruit Growing and Descriptive Catalogue, I sincerely thank you for the liberal patronage that you have bestowed upon me in the past, and earnestly solicit a continuance of the same. All orders, large or small, shall have my prompt attention.

With a life's experience in the fruit growing and nursery business, and being largely interested in fruit growing for market—having visited all of the leading markets in the United States—I am now enabled to offer to the fruit grower my stock of select varieties, such as I think cannot fail to give general satisfaction. I do not claim to offer better trees than can be bought elsewhere; but in growing them my object is to produce first-class stock and such varieties as are adapted to the Southern climate, with numerous ones that are grown far North. My terms and prices will be found as reasonable as those of any other first-class Nursery in the South. Orders should be sent in early so as to secure best varieties; besides, it is preferable to transplant as soon after first killing frost as practicable, as the roots of the tree grow all during the winter months, thereby insuring greater success. Trees and plants will be securely packed and delivered at the railroad depot at Marshallville, Ga., free of charge, purchasers incurring all risk after such delivery. Write your orders on a separate sheet, giving plain and exact directions for shipping. State whether you wish goods shipped by express or freight. Give plain address, post office and county.

Terms: Cash with order, C. O. D. by express, or satisfactory reference. Remittances may be made by express, check on New York, or post office order. Registered letter, or postal note can be used on small amounts.

Address,

EUGENE M. RUMPH,
MARSHALLVILLE, GEORGIA.
TRANSPLANTING NOTES.

The great requisite to success in this is the preparation of the soil and the pruning of trees before planting. The ground should be thoroughly broken up by deep ploughing, and the holes dug from 2 to 3 feet wide and 1 1/2 to 2 feet deep. A few shovels full of stable manure, top soil and wood ashes, with some guano well composted and thoroughly mixed with the earth in filling the holes, adds greatly to the vigor of the tree. Care must be taken in cutting off all the broken roots from the tree with a smooth upward cut, then place it in the hole the depth that it grew in the nursery, spreading out the roots to their natural position, and fill in the earth to a level with the surface, pressing it firmly around the roots of the tree with the foot. When this is done the tree should be drawn up several inches, so as to give the roots a downward tendency. A sufficient amount of earth must be thrown around the tree to allow for settling, and to prevent the water from collecting and souring around the roots of the tree. All branches of a one-year-old apple or peach tree should be cut off, leaving a single stem about two feet high in the spring. As the sprouts come out around the tree, they should be broken off, leaving four or five equally divided at the top. Trees planted at this age succeed best, as they can be removed from the nursery with less damage to the roots.

</table>
ASTRACHAN RED APPLE.
The most reliable and extensively cultivated. It produces abundant crops every alternate year, and by thinning the fruit the year of heavy bearing a fine crop may be expected yearly. It succeeds best in rich sandy loam with clay sub-soil. It is well to put lime or wood ashes around trees. All winter varieties mature here in October and November, and require delicate handling when gathered to keep well. They should be pulled from trees with hand and placed in a cool cellar, free from frost and very little or no light, as those exposed to light will dry up.

PRICES OF APPLE TREES.

Standard varieties, 3 to 5 feet, 12 cents each; $10.00 per 100; $70.00 per 1000; 500 for $40.00.

Choice Summer Varieties.

ASTRACHAN RED.

Large and perfect shape, bright pink on one side, turning to dark red; very tender and juicy, acid and pleasant; tree vigorous and healthy and a rapid grower. This is the best of early varieties, fine for market, sells at fancy prices owing to its earliness, size and quality, and beautiful color. Ripens May 25th to June 15th.

EARLY HARVEST.

Rather above medium size, skin bright yellow; flesh juicy, crisp and excellent flavor. Splendid for cooking purposes. Ripens June 10th to 20th.

RED JUNE.

Medium, conical shape; skin dark red, one side bright scarlet; flesh very white, tender and pleasant, of a banana flavor. Ripe June 10th to July 1st.

HORSE.

Very large, roundish, little flat, bright yellow, slightly tinged with red on sun side; flesh yellow and very tender and acid, splendid for cooking and making cider. Ripe July 15th to August 1st.
SIMMONS' RED.

Medium, roundish, skin red with stripes of yellow and dark red; flesh yellow, aromatic, very juicy, and of fine flavor; tree is very compact and a thrifty grower, bearing young and profusely. As a cider apple it has no equal; is a little acid and splendid for cooking. Ripe from June 15th to September 1st. Splendid for shipping.

AUTUMN VARIETIES.

CARTER'S BLUE.

Large size, roundish, oblate, skin greenish, striped with dull red and blue; flesh a bruised yellow, crisp and very aromatic, sweet and nice. Ripe September 15th.

TAUNTON.

Roundish and very large, conical shape, skin yellow, with red cheek, slightly striped; flesh yellow, very tender and juicy, of good flavor. Ripe September 1st.

EQUINE TELEE.

Very large, oblate, skin bright yellow with red cheek and stripes of darker red; flesh rich and juicy of excellent flavor, sub-acid. Ripe September 15th to October 15th.

BUNCOMBE.

Large, oblong, skin yellow, shaded with red; flesh juicy, crisp and red. Ripe September 20th.

WINTER VARIETIES.

SHOCKLEY.

Medium, conical, skin yellow, overspread with bright crimson; flesh juicy, crisp and sweet; tree very rapid grower, compact and early bearer, often producing a crop of fruit the second year after transplanting. The most desirable winter variety for the South, where it not only bears regular and abundant crops, but keeps until June. A very profitable market variety. Can sell all you make at good prices. It will do well on any soil. Ripe October 1st, and will keep in cellar until June.

MANGUM.

Medium, rather flat, skin bright red, touched with yellow; flesh yellow, very tender, juicy and little acid, rich and aromatic; tree very prolific, luxuriant and compact grower, abundant bearer. Ripe October 1st, and will keep until March.
CULLASAGA.
Medium, roundish, skin yellow, highly covered with red; flesh mild, crisp and good, tender and sweet. Ripe October 25th to January.

JUNALASKEE.
Medium, oblate, roundish, skin greenish yellow, flesh yellow; juicy, tender and sub-acid. Ripe November to January.

KITTAGESKEE.
Medium, roundish, skin yellow speckled, tinged with brown; flesh yellow, juicy, crisp, tender and slightly acid. Ripe November 1st to February.

NICKAJACK.
Very large, roundish, skin striped and shaded with dull red; flesh yellow, juicy, tender, sub-acid and very good. Ripe October and will keep until February. Good market variety.

STEVENS’ WINTER.
Medium size, roundish, oblate, skin greenish yellow, shaded and striped with red; flesh yellow, or a creamy white, juicy, firm, sweet, aromatic and delightful. Its flavor is very much like a pineapple. One of our best winter apples, a splendid keeper, and sells at fancy prices in any market. Young trees in nursery rows at two years old are loaded with fruit. It is a very heavy and compact bearer; it is very much like Shockley in keeping qualities, will keep the entire winter if put away in a dark cellar where not too cool and damp. Ripe November to June.

BEN DAVIS.
Large, roundish, conical, skin yellow, with red cheek; flesh sub-acid, juicy, tender and very good, pleasant to taste. Ripe November to March.

WINE SAP.
Medium, roundish, skin yellow, washed with dark red; flesh yellow, juicy, tender and nice. Ripe October to January.

SIMMONS’ RED,
SHOCKLEY APPLE.
PEACHES

This is the most profitable fruit grown today at the South. It adapts itself to any soil, but does best in a sandy loam with red clay sub-soil, on land well drained and elevated, as the fruit is less liable to be killed by spring frost. The Georgia peach is growing very popular among the Northern markets, and is called for in preference to California, as it is much sweeter, while they have the color, Georgia produces the juice and sugar, with size and color. Take it in its fresh ripe state and there is no fruit that so delights the eye or palate, and it not only appeals to the appetite but is highly conducive to health. It is also excellent for culinary purposes, either canned or evaporated. Every one who owns a piece of land should have a peach orchard.

PRICE OF TREES

SINGLE TREES. 3 to 4 feet, 12 cents each; per 100, $9.00; per 1000, $50.00; 500 for $30.00.

SELECT LIST—Freestones.

EARLY TILLOTSON.

Medium, skin yellowish white and nearly covered with red, darkening on the sun side. This is one of the best market varieties and ships well and commands the best prices. Free from rot, tree thrifty, and compact grower, bears young, flesh very compact, juicy, sweet and tender. One of the best for home use as well as market. Ripe June 10th to July 1st.

EARLY RIVERS.

Rather large, skin greenish white with a very delicate pink cheek; flesh rich, juicy, melting, tender and sweet, skin very thin and easily bruised. One of the best for home use, for market it does very well. It is well to add to your list for market if dry at time of ripening. It ships well and brings fancy prices. Ripe June 5th to 20th.

HALE'S EARLY.

Fruit medium to large, skin pale red with stripes yellow and dark red; flesh white, melting, juicy and good, splendid for home use, but not for market. Ripe June 1st to 20th.
ELBERTA PEACH.
EARLY ALEXANDER.

Medium to large, skin dark red where exposed to sun; flesh greenish white, juicy and sweet; for early shipping the best if ripens in a dry season. It is very profitable. Ripe May 15th to June 1st.

MOUNTAIN ROSE.

Medium, skin white, clouded with red; flesh juicy vinous, excellent flavor, good bearer. It is good for market, ripens with Tillotson, June 25th.

FLEITAS, or YELLOW ST. JOHN.

Rather large, skin yellow with dark red cheek, a perfect beauty of excellent flavor; flesh yellow, juicy and very sweet; very good for market. Ripe June 15th to 25th.

AMELIA.

Very large, roundish, oblong, skin white, shaded with crimson; flesh white, juicy, rich and sweet, of splendid flavor. Ripe July 1st to 15th.

BELLE OF GEORGIA.

Very large, oblong, skin white with red cheek; flesh white, firm and of excellent flavor; the fruit uniformly large and showy; tree a rapid grower and very prolific, a seedling of Chinese Cling and originated by Mr. Lewis Rumph of Georgia. For market this is one of the best; it is thick skinned, and ships to Northern markets with safety. If you plant for market be sure to head your list for this grand new peach. Ripe July 1st to 20th.

THURBER.

Large, of beautiful size and color; it is a seedling of Chinese Cling, which it resembles very much. Originated by Mr. P. J. Berkmans. Ripe July 5th to 20th.

CHINESE FREE.

Very large of uniform size, skin white with red cheek, a very handsome peach; flesh red, firm, of excellent flavor, free from rot, and has a thick skin which makes it very desirable for market, and is grown largely on our farm, as it commands high prices in any market. Do not fail to try this variety. Ripe July 5th to 20th.

CRAWFORD'S EARLY.

Large, oblong, skin yellow with red cheeks; flesh yellow, sweet, melting, rich and juicy, of excellent flavor. This is one of the best for shipping to distant markets owing to its size, color and quality; skin thick and free from rot. Ripe July 10th to 25th.

STUMP THE WORLD.

Very large, roundish, skin creamy white with red cheek; flesh white, juicy and good; for shipping it is splendid, as it is a good bearer and has a thick skin which makes it good for market. Ripe July 10th to 25th. Be sure to add to your list.
ELBERTA.

Extremely large, skin golden yellow, turning to a red cheek on sunny side. It is the handsomest peach grown, very uniform in size; flesh yellow, very fine grain, juicy, very sweet and of excellent flavor. A tree laden with fruit makes a handsome appearance, and is a very prolific bearer. Young trees two years old sometimes produce heavy crops: furthermore, it is the hardesty variety grown, as it stands the spring frosts and heavy winters; does well as far North as Rochester, N. Y. This makes it one of the best market peaches ever grown. The skin is thick and can be pulled from the tree green and put in house and will color and ripen as well as if left on the trees. All of the Northern markets are familiar with "Elberta," and the trade calls for it in preference to California or any other variety, except Belle of Georgia. These two can be called the King and Queen. Ripe July 5th to 25th. They bring higher prices in markets than any other peach grown.

CRAWFORD'S LATE.

Much larger than "Crawford's Early," though it resembles it in color, shape and quality, and ripens about ten days later, little too late for market, but it is well to have it in your market orchard. In 1893 it netted us good prices, as the market was bare at that time. Ripe July 15th to August 1st.

MICHIGAN.

Medium, oblong, skin white, washed with dark red, partly striped; flesh very juicy, white, or of a creamy white, sweet and melting; the skin is very thick and has a mossy appearance. For market it is good, ships well on long distance. It will be well to add on your market list. Ripe June 20th to July 1st.

FAMILY FAVORITE.

Large, and about the size of Chinese Free, possibly a shade larger; skin white, with bright red on sun side. Some are darker than others; flesh white and of a delicious flavor, juicy, sweet and melting. For shipping it is good. Originated by Mr. John Parnell of Georgia. It stands shipping to distant markets. Ripe July 5th to 20th.

EMMA.

Large, about size of late Crawford and ripens at a season when the market is bare; skin bright yellow, with dark red on side exposed to sun; flesh yellow, juicy, sweet and of excellent flavor; tree a prolific bearer and does well on any soil, splendid for market. Sold for fancy prices in Northern markets in 1893. This is a new variety and should be planted largely. Ripe July 15th to August 1st.

CROSBY.

Very large, new, originated at Billerica, Mass. This ironclad peach is a constant heavy bearer and stands spring frost and cold winters. While all others failed the "Crosby" trees were loaded with perfect fruit. Skin yellow, turning to red cheek on sunny side; flesh yellow, juicy, tender, very
BELLE OF GEORGIA PEACH.
sweet and splendidly flavored, thick skin and one of the best for market. There are only a limited supply of these trees in the country, and it stands every one in hand to plant a few hundred. Ripens July 15th to August 1st. Price of nice trees, 3 to 4 feet, 25 cents each; $20 per 100; $150 per 1000.

ELYSON.

Medium, perfect shape, uniform size, new, skin white with red cheek, or yellowish; flesh creamy white, very sweet, rich and juicy. This peach is of Northern origin, and is very hardy and thick skin. This makes it very valuable for market, as for spring frosts and cold winters it stands them well. Ripe July 5th to 20th. Price, 25 cents each; $20 per 100; $150 per 1000.

SELECT LIST—Clingstones.

GENERAL LEE.

Very large, skin creamy white, shaded with red; flesh juicy, rich and melting, of high flavor, good market variety for home markets. Ripe July 5th to 20th.

WHITE ENGLISH, or HEATH’S LATE WHITE.

Large, oblong, narrowing to both ends, skin creamy white, with a pale tinge of red on the sunny side; flesh a greenish white, very juicy and tender, melting. One of the most popular varieties for canning, preserves, etc. Ripe August 20th to September 5th.

CHINESE CLING.

Very large, globular and perfect shape, skin creamy white with red cheek; flesh white and creamy, red at seed; very juicy, of good flavor; for home use it is splendid. Ripe July 15th to 25th.

DUFF YELLO.

Medium, roundish, skin yellow, covered with dark red; flesh yellow, firm, juicy, sweet and fine flavor. Ripe July 5th to 15th.

Ten Best Varieties for Market.

ELBERTA, FAMILY FAVORITE, CROSBY,
BELLE OF GEORGIA, EMMA, CRAWFORD’S EARLY,
TILLOTSON, THURBER, MICHIGAN,
CHINESE FREE,
KEIFER PEAR.

For market, the Keifer has no equal, as it is very firm and will color in crate or in house, commanding the highest market price. It is a seedling of the Chinese Sand Pear, supposed to have been crossed with Bartlett. Skin yellow, with red cheek, of excellent flavor; tree a vigorous grower and free from blight. Ripens September 1st to November 1st. Price of fine trees, 20 cents each; $15 per 100; $75 per 1000.
The cultivation of this fruit has increased largely the past few years, and is now planted largely for market and various uses. The list we offer for sale are well adapted to the South, and most of them free of blight. They make a beautiful border around an orchard or farm. No fruit farm is complete without Pears.

**PRICE OF FINE TREES.**

*Standard varieties, 3 to 5 feet, 20 cents each; $1.50 per 100; $75 per 1000.*

**LECONTE.**

Fruit large, skin greenish yellow; flesh white and melting, quality medium, excellent for canning and evaporating. It is noted for its productiveness, rapid growth, and almost free from blight. Ripens July 5th to August 15th.

**BARTLETT.**

Very large, skin smooth, clear yellow; flesh white, juicy, sweet and of exceedingly fine flavor. One of the most popular and best varieties grown. Ripe July 10th to August 15th.

**CLAPP'S FAVORITE.**

Large, skin pale yellow, delicately splashed with crimson in the sun; flesh fine grained, melting, rich, vinous and sweet. Ripe August 1st to September 1st.

**SECKEL.**

Small, skin yellowish brown, with red cheek; flesh very juicy, melting, rich and delicious. Ripe August 1st to September 1st.

**TYSON.**

Medium size, bright yellow with reddish brown cheek, melting, sweet, buttery, juicy and a vigorous grower. One of the best pears grown for home use or cooking purposes. Ripe July 1st to August 1st.

**HOWELL.**

Rather large, obtuse pyriform, pale yellow with red cheek; quality good to very good, excellent for cooking purposes. Ripe August 15th to September 25th.
IDAHO PEAR.

A valuable, hardy, pear; originated in the State for which it is named, where it has survived winters when the thermometer ranged from 15 to 30 degrees below zero. It is of the largest size, specimens weighing 23 ounces; color greenish yellow, with russety spots; form roundish obovate; flesh melting and juicy, of excellent flavor, rich and slightly vinous; core exceedingly small and without seeds. Ripens September 15th to November 1st. Price of fine trees, 50 cents each; $30 per 100.
For market, the plum is among the first. Spring frost and curculio, with heavy winds and rain while in bloom are the worst enemies. We offer only the very best varieties for market, of late introductions, all of which are very profitable and adapted to this climate.

**WILD GOOSE.**

Very large, skin bright red, oblong; flesh firm, juicy and sweet; one of the most popular market varieties, as the fruit can be gathered green and packed in crate or house, and in two or three days it will be perfectly ripe, of a rich, bright red color, very thick skin and stands shipping to distant markets well. We have sold this fruit in the New York market as high as $1.80 per bushel. One tree produced as many as five bushels perfect fruit. Ripe June 10th to 25th. Price of trees, 15 cents each; $10 per 100; $65 per 1,000.

**ROBINSON (New.)**

Medium size, skin bright red; flesh yellow, juicy and sweet; tree a very early and prolific bearer; have often seen little trees in nursery rows full of fruit; it is truly an iron-clad variety; it resembles the "Wild Goose" very much in color and shape, but is somewhat smaller. Ripe June 15th to July 1st. Price of trees, 20 cents each; $12 per 100; $75 per 1,000.

**KELSEY’S JAPAN.**

Very large and attractive; flesh yellow, very sweet and of splendid flavor; skin rich yellow, with pale cheek; tree a very thrifty grower, but rather shy bearer; its foliage perfectly beautiful; two-year-old trees sometimes produce a dozen or more plums. Ripe August 1st to September 1st. Price of trees, 30 cents each; $20 per 100.

**MARIANA.**

Large, round; skin crimson and very much like the Windsor Cherry; flesh firm and well flavored, juicy, sweet and good; tree prolific and early bearer. Splendid for home or market use. Ripe June 1st to 15th. Price of trees, 15 cents each; $8 per 100.

**BURBANK.**

Imported from Japan, and is considered among these as one of the best, entirely hardy and an excellent bearer; fruit medium to large, roundish, conical, dark red or purplish; flesh yellow, melting, juicy, rich and sweet; stone small and free; a splendid shipper; tree a very vigorous grower and begins to bear usually when two years old. Ripe June 20th to July 15th. Price of trees, 30 cents each; $20 per 100.
**BOTAN (New, Yellow-Fleshed) PLUM.**

This is a recent introduction from Japan, and has proven to be among the best varieties for market. It is hardy, stands hard Winters and Spring frosts and is curculio proof; tree a vigorous grower and beautiful, very productive and early bearer; young trees standing in nursery were often loaded down with large, perfectly shaped plums. Very large, skin bright red, sometimes yellow and dark red; flesh yellow, very rich, juicy and sweet. This is an excellent variety for market. Skin thick and stands distant shipping; colors well. Ripens June 15th to July 15th. Price of trees, 20 cents each; $12 per 100; $75 per 1,000.
NIAGARA GRAPE.

GRAPES

NIAGARA.

Vines of vigorous growth and very prolific, with tough, leathery foliage; clusters large and compact, sometimes shouldered; berries large, round, with thin skin, greenish white turning to pale amber; sweet, very rich and juicy. Ripe July 1st to 25th. Price of vines, 10 cents each; $1 per dozen; $4 per 100; $35 per 1,000.

DELAWARE.

Medium bunches, compact; berries rather small; thin skin, pale, delicate red; flesh juicy, vinous and sweet, of excellent flavor; one of the finest table grapes grown. Ripe July 15th. Price, 10 cents each; $1 per dozen; $5 per 100; $40 per 1,000.

CONCORD.

Large bunches, compact; berries large, almost black, some blue bloom; skin rather thick; well adapted to this climate and for shipping to distant markets; flesh juicy and sweet. Very popular variety for home or market. Ripe July 15th. Price 10 cents each; 75 cents per dozen; $4 per 100; $25 per 1,000.

IVES.

A popular early market variety; bunches rather above medium, compact; berries medium; skin thick and black; flesh sweet and juicy; excellent for shipping purposes. Ripe June 20th. Price 10 cents each; 75 cents per dozen; $4 per 100; $35 per 1,000.
FIGS

*Price, 25 cents each: $15 per 100; $100 per 1,000.*

**BROWN TURKEY.**

Very large, oblong, perfect shape; skin dark brown, covered with a blue bloom; flesh a pale red and of excellent flavor. Ripens June 20th to August 1st.

**CELESTIAL,**

Medium size; skin pale violet, with a bloom; flesh very sweet; hardy and very prolific variety; tree a very rapid grower, some specimens measuring two feet in diameter.

**LEMON.**

Very large size; skin a bright lemon color; flesh sweet and delicious.

MULBERRIES

*Price, 25 cents each: $15 per 100.*

**HICK'S EVER-BEARING.**

Rather large size; flesh sweet, insipid, prolific grower and produces abundant crops four months in the year. It is one of the finest crops grown for poultry and hogs.

**DOWNING'S EVER-BEARING.**

Medium size; flesh rich, sub-acid, prolific bearer and thrifty grower. Ripe May to July.

QUINCES

*Price of trees, 25 cents each: $15 per 100.*

**CHAMPION.**

Very large, pear shaped; flesh rather harsh; thrifty grower and very prolific bearer. Ripe in November.

**ORANGE.**

Large, roundish; skin golden yellow; flesh rather tender; splendid for cooking; considered the best variety.

**CHINESE.**

The largest variety grown, specimens often weighing three pounds; skin greenish yellow; flesh tender when cooked, of a rich odor. It is splendid for making preserves, jellies, etc. Tree is very hardy and never fails to bear a crop. Ripe December 1st and keeps until March.
EARLY HARVEST BLACKBERRY.

This is one of the most productive varieties of blackberries in cultivation. It is very valuable for market owing to its firmness and early ripening; skin firm and perfectly black; flesh rich, juicy, sweet and splendid for cooking or for shipping. Ripe May 15th to June 10th. Price, strong plants, 40 cents per dozen; $3 per 100; $12 per 1,000.

GOLDEN QUEEN RASPBERRY.

The best Raspberry grown for home or market use. It is of large size, great beauty, high quality, hardy and productive. The canes are of the strongest growth and succeed admirably at the South. It is a most valuable variety for market, and no garden is complete without it. The largest berries, of excellent flavor. Ripen May 20th to June 15th. Price, 50 cents per dozen; $3 per 100; $12 per 1,000.
E. M. RUMPH'S DESCRIPTIVE CATALOGUE.

— RASPBERRIES —

ROYAL CHURCH. (New.)

A recent introduction from Ohio. In our trial grounds the past season it gave great satisfaction, and consider it one of the best of the red varieties. The berries are of very large size, of handsome bright red color, of firm flesh and fine quality. The canes grow well, very hardy and productive; foliage rich and healthy. One of the best for shipping or table use; canes are covered all Summer with blossoms, green and ripe fruit. Every one who has a garden or farm should try this grand new variety. Ripens May 15th to July 15th. Price, fine plants, 25 cents each; $2 per dozen.

BRANDYWINE.

Good size, bright crimson color, firm and very valuable for market; a thrifty grower and requires good soil. It is very attractive, of delicious flavor, old variety. Price, strong plants, 35 cents per dozen; $2 per 100.

CUTHBERT.

An old, valuable variety, very productive; thrifty growth; one of the best for market; berries a bright red; excellent flavor. Price, 35 cents per dozen; $2 per 100.

GREGG.

A very popular market variety; canes strong and vigorous growth; does well in the South; berries firm, black, with heavy bloom, of fine flavor. Price, 35 cents per dozen; $2 per 100.

OHIO.

One of the best black caps; very productive, holding its flavor and shape better than other kinds; berries good size, excellent quality. Price, 35 cents per dozen; $2 per 100.

— DEWBERRIES —

LUCRETIA.

Decidedly best of all Dewberries. As early or earlier than Early Harvest Blackberry and much larger. It is a superb fruit, large and handsome, shining jet black, melting, and delicious flavor. The plant is entirely hardy everywhere; does best in the South; healthy, strong grower and exceedingly productive; found it to be enormously productive on our trial grounds the past season; all it needs is a trial; will bear first year from plants. Price, 40 cents per dozen; $2 per 100; $10 per 1,000.

— NECTARINES —

EXCELSIOR.

This is the best variety grown for home or market; very delicate and excellent flavor; productive and thrifty grower; skin yellow, with red cheek; flesh yellow, highly flavored, rich, juicy, sweet and melting. Price of trees, 20 cents each; $2 per dozen.
STRAWBERRIES

PARKER EARLE.

A new introduction; one of the best for home or market use; forms a stocky plant, very productive and a thrifty grower; stands hot sun; berries long, regular shape, crimson, of good flavor. Price, 35 cents per dozen; $1.50 per 100; $8 per 1,000.

WILSON'S.

A very popular old sort, and has many good qualities; valuable for market, as it is firm. Price, 25 cents per dozen; $4 per 1,000.

SHARPLESS.

Demands good, rich soil for best results. The plant is large, vigorous and productive, and does well for a near-by market; very large, of good flavor. Price, 25 cents per dozen; $4 per 1,000.

MICHEL'S EARLY.

A very popular Southern variety worthy of planting for market or home use; very large, good flavor and productive. Price 25 cents per dozen; $5 per 1,000.

CRESCENT.

Very few varieties are so productive as this, and none succeed better under neglect; berries large, good flavor. Price, 25 cents per dozen; $4.50 per 1,000.

MAY KING

One of the best early kinds for home use and near-by markets; good flavor and productive. Price, 25 cents per dozen; $4.50 per 1,000.

FINCH.

This is one of the finest berries we have tried on our farm. It is very large, of perfect shape, uniform, a thrifty grower, and bears heavy crops on any soil. For market it has no equal: its flavor is delicious; will stand a dry spell where others fail. Give it a trial for market. Price, 25 cents per dozen; $4 per 1,000.

ENGLISH MORELLO.
Large, dark red, becoming nearly black; flesh dark crimson, juicy, rich, acid. Price 25 cents each; $15 per 100.

BLACK TARTARIAN.
Large, rich, juicy and sweet, vigorous and productive. Price, 25 cents each; $15 per 100.

APRICOTS

MOOR PARK.—A very valuable variety; productive and good grower; yellow, with red cheek; rich, juicy and sweet. Price, 25 cents each; $2 per dozen.

ALEXANDER.—An improved Russian variety; an immense bearer; fruit of large size, oblong, yellow, flecked with red; flavor sweet and delicious; tree hardy; one of the best. Price, 25 cents each; $2 per dozen.

ACME.—Originated by Prof. J. L. Budd, of Iowa, from pits sent from China; tree very vigorous and prolific bearer; fruit large size, yellow, with red cheek; perfectly delicious, rich, juicy and sweet. Price, 30 cents each; $2.50 per dozen.
FAY'S PROLIFIC CURRANT.

The leading red variety; one of the hardiest and best under cultivation. It has been widely planted and has given entire satisfaction. The bush is a strong grower, wonderfully prolific and comes into bearing early; fruit is large, bright red, of excellent flavor, less acid than cherry, a regular bearer, and favorite with all market growers. It does well at the South.

Price, two years, $1 per dozen:

$6 per 100.

SPANISH PEANUTS.

This is a wonderful crop—the best and most profitable of all peanuts. It is very sweet, juicy and enormously productive; very easy to gather, as the nuts hang and grow all in a cluster on one stem. No crop has ever been introduced that has given as much satisfaction among stock raisers. It fattens hogs much better than corn or potatoes. Two crops can be made on same land in one season. They mature a crop in seventy to ninety days from planting, and will produce from twenty to sixty bushels per acre on common land. No farm is complete without a few acres. For market, it is the best; it is clean, sweet, and never fails to mature two nuts to the hull. Price, $1 per bushel; ten bushel lots, 90 cents per bushel.

Special rates on large lots.
There is no vegetable grown that is more profitable and liked by all as asparagus. For the table it is just excellent; for market, very profitable. No crop that you can plant will give you more profit, provided the proper care and attention is given. Now, if you want to grow for market, first select your land—rich, sandy loam, rather elevated and level; then clean all trash off and sub-soil with large two-horse plow. After it stands for a few weeks, take a two-horse (or Dixie stock will do) and open deep trenches five feet apart and eighteen inches deep. When this is done, then put in from ten to one hundred loads of stable manure per acre, one ton of good ammoniated guano and fifty bushels of cotton seed; then mix up thoroughly with soil. If you can get it, put in about a thousand pounds of salt. Now you are ready to set out plants, requiring 3,000 per acre; drop them two feet in drill; divide the roots and run them each way in drill, drawing a little dirt in on them, say two or three inches; this will leave a little hollow, so when it comes up, draw the dirt in to a level; work constantly and keep free of weeds and grass, and you will get at two years from planting 1,000 to 3,000 pounds. It sells in markets at 15 to 30 cents per pound. If well cared for, it is a very profitable and easy crop to make. Palmetto is the finest variety grown; two weeks earlier and more productive than any other offered for sale. We have discarded all others for this one for market, as we have tried them all thoroughly. Price, strong two-year plants, 75 cents per 100; $4 per 1,000.

PEARL MILLET

This is growing very popular with all poultry and stock raisers. It is considered very valuable, and should be planted largely for stock and poultry. It can be planted as early as April 1st, and in one month you can cut it or let your cows, horses, etc., graze on it. You may cut it every ten days the entire Summer, and it will then grow up five or six feet high and make a long head eighteen inches in length, which is a solid roll of pearl-looking seed. This is very sweet and tender. All poultry are very fond of it. It also makes splendid flour; this is nice for cooking. If you once plant this valuable stock and poultry feed you will never be without it. Price, 15 cents per pound; 10 pounds for $1; $8 per 100 pounds. Special rates on large lots.

SMOCK PEACH PITS

Should you wish to plant any peach seed, we can furnish you the celebrated Smocks. These are the finest grown: large, sound and easy to open. Seedlings from these are a great deal more healthy and larger than the natural ones. Smock peaches are very large, yellow freestones, and produce the best seed for planting; would advise you to give a trial if you plant any seed. Price, per bushel, $1.50. Special rates on large lots.

FRUIT CARRIER CRATE

At last we have perfected a package for shipping to distant markets. This is the 24-quart Carrier Crate. The frame is made of strips one inch square, all strongly jointed together. The sides, bottoms, trays and tops are made of clean, bright poplar slats; the case is then filled with six 4-quart baskets, three in bottom and three on top, with tray between. This is one of the strongest and most durable packages now made. The ribs are all made to fit in, and when nailed up it is very strong. This is the only one made with solid slat head, which gives good space for your stencil. With a life's experience in the business, this carrier we find to be the best made for shipping peaches, apples, plums, grapes, pears, tomatoes, cranberries, and in fact all fruits and vegetables. Commission merchants like it and the trade pays more for fruit in them. Prices, made up baskets and all complete, $23 per 100; $200 per 1,000; knocked down, $22 per 100; $190 per 1,000—2,000 to the car.
REAL ESTATE.

Valuable Fruit and Farming Lands
Located in the Finest Section of GEORGIA.

FOR SALE BY

EUGENE M. RUMPH,
MARSHALLVILLE, GEORGIA.

ARE you seeking to invest for pleasure or profit? If so, this section of Georgia offers many advantages to both. The lands are somewhat elevated and level, while parts are a little rolling.

The soil is a rich, sandy loam, with solid red clay foundation. For farming and truck growing it is unsurpassed, and is especially adapted to all kinds of fruits. It is the home of the peach, which command higher prices in the Northern markets than those of California or any other State. While inspecting the New York markets last season we were told by one of the leading commission men that they would rather have one car of Georgia peaches than five from California. Why? Because they are large, uniform in size, very firm, juicy, sweet, of excellent flavor and highly colored, perfectly free of rot and bug pest. In 1892 we had a ten-acre peach orchard four years old that sold for $2,500 net. It contained the following varieties: Elberta, Belle of Georgia, Chinese Free and Tillotson. With one crop in four years, it pays better than any crop you can plant. The climate is good and the finest country on earth for a family of small means. Potatoes, sugar cane, corn and peanuts grow in abundance. There are plenty of good public schools and churches of all denominations. We have numerous railroads, with splendid facilities for shipping at low rates to Northern markets. We can make it to your interest to correspond with us, and feel sure we can please you, as we are acquainted and have a life's experience in growing fruits and truck for profit. We have some beautiful homes (among law-abiding people) and lands to offer, any distance you wish from town and railroad. All information will cheerfully be given.

Very respectfully,

EUGENE M. RUMPH.
Fruit growing for profit and fruit growing for home use or for pleasure can all be made very profitable. A family orchard comprising all kinds of fruits, containing one to three acres, is one of the best investments to be made for home use. There is nothing you can grow that is more healthful than fruit. The more we consume the less medical bills we have to pay. For profit, there is nothing we can plant that is more remunerative than fruit. First, we take the peach, with all the new and latest introductions. The large markets at the East and West and a number at the South consume all the fruits we grow, at profitable prices, provided you ship none but select fruit, exercise care in packing, use the neatest and strongest packages, ship over the quickest and best route, and consign to none but reliable and established commission houses. By so doing, you will be handsomely rewarded. What I say about fruit growing is from a life-time experience and close observation. About fifteen years ago we only grew on a small scale, say from ten to fifteen acres. The first commission house we became acquainted with in New York was Messrs. Archdeacon & Co., who handled the first Georgia peaches, and at that time sold select peaches at $5 per one-third bushel crate, which held from thirty to forty of the Elberta and Belle of Georgia varieties, being from eleven to sixteen cents each. Wild Goose Plums sold at $5 to $6 per crate of the same size. At that time there were no Georgia peaches on the market, but at the present day the Georgia peaches command the highest price on the market, and the trade calls for them in preference to California or any others. California produces the color, but Georgia furnishes the color, flavor, size and quality. While in New York last season, a prominent commission merchant remarked that he would rather have the Georgia peach five to one than the California, and that the markets will always pay fancy prices for nice, sound stock. We are now offered splendid facilities by the various railroad and refrigerator lines to place our fruits
and produce on the Eastern and Western markets at low rates on quick time. Next, we find apples a good money crop. Nice, select stock and early varieties sell well. The Southern markets can consume all that we can grow. The best variety for market is the Astrachan Red. Again, we find lots of money in plums. They are easy to gather and pack. The new varieties will pay you a handsome profit. Besides, you should have pears in your orchard. With Idaho, a new, large and profitable variety, Keifer next best, and LeConte for Summer, you have three of the best. One of the best and quickest-paying crops is asparagus. The cost of plants for one acre—fine, large, two-year plants—is $4 per 1,000, or $12 per acre, as it requires 3,000 per acre. The second year from plants, if well cared for, you will make from 1,000 to 3,000 pounds, which sells in all the markets at from 15 to 25 cents per pound. It is very easily grown, but requires a great deal of fertilizing. All berry crops pay well. One of the best is the Early Harvest Blackberry, a new introduction. A trial will convince you. It requires about 3,000 plants per acre, and will pay you from $100 to $200 per acre. The fruits I have mentioned are the best for market. There is no kind of fruit grown and offered in this book but what you will find very profitable. Truck growing pays well. Among the best for market: Tomatoes, Cucumbers, Squashes, Peas, Snap Beans, Turnips, Radishes, etc. We can furnish choice, select seed at special prices, and can make it to your interest to send us your orders.

Advertisements.

In this book you will find a few pages devoted to advertisements, which will be largely to the interest of all fruit growers, farmers, shippers and dealers to read over and keep for future reference, as they are all reliable. Correspond with them.

Something

About a

Great

Paper.

The "Atlanta Constitution" is the largest and best paper in the Southern States. Its corps of editors are among the foremost writers of this country. Joel Chandler Harris, who has international fame, achieved by his "Uncle Remus" stories; also, Wallace P. Reed, the short story writer of the South, and F. L. Stanton, as sweet a poet as there is in America, are regularly employed on the staff. Its news is the freshest that money and labor can procure.

The paper is devoted to the interest of the entire country, and especially to that of the South.

Would you like to subscribe either for the Daily or the Weekly? The Daily is only $3 per year; the Weekly $1 per year. If so, send a postal card to the "Atlanta Constitution," Atlanta, Ga., informing them of the fact.
The oldest and largest receivers of Peaches and other Fruits from the Delaware and Maryland Peninsulas. Mr. Hobson being a large grower of Peaches and other Fruits, fully understands the different varieties and qualities of Peaches. The house is better prepared to cater to the Fruit Trade here than those who are less familiar with the Fruit interest.

We refer you to a few of the leading growers of Delaware, some of whom have shipped us regularly for twenty years:

*Dr. H. Ridgely, President Farmers' Bank, Dover, Del.*
*D. J. Cummins, President Smyrna National Bank, Smyrna, Del.*
*P. L. Cannon, President First National Bank, Seaford, Del.*
*Sixth National Bank, Philadelphia.*
To those of the Frigid North

Who wish to seek Homes and

Farms in the Balmy South.

The best place to live is

Where fruits of all kinds flourish and grow to perfection.
Where a farmer can have a moneied crop growing each month in the year.
Where the Winters are mild and void of damp, mucky weather, so promotive to that dreaded disease CONSUMPTION.
Where the resources of the lands are not confined to a few fruits, cereals and vegetables, but where the land will grow to perfection every fruit, cereal and vegetable known in the Temperate Zone.

Such a spot the Northerner, the Northeasterner and the Northwesterner calls a Sweet Haven—A Paradise—when he finds it.

Such a place and such lands as are named above is found along the line of the

Atlanta & Florida Railway.

Which reaches from Atlanta to Fort Valley, Ga., a distance of 105 miles, and on either side of the road, from Fayetteville to Fort Valley, the finest Peach Lands in the South are found. Lands that will grow any kind of fruit, agricultural crops and truck.

From Fort Valley, going North for thirty miles, the finest Georgia Watermelons are grown in large quantities, and is a very remunerative crop.

This year, when all fruit everywhere in the fruit section of Georgia, is killed, there will be a small crop along this line of road,

A Proof Sufficient of the Adaptability of this Soil for Peaches and Other Fruits.

This line runs through the healthiest country in the South.
The water is unsurpassed for healthfulness as well as purity.
The mercury never rises higher than 90 degrees along the ridge on which this road is built.
The people there are prosperous and contented.
There is plenty of room for a few more thousand families.
The lands are cheap, and titles are good beyond a doubt.
Stock can be raised cheaper in this section than in any country on the globe.

A PERSONAL INVESTIGATION WILL PROVE ALL THE CLAIMS MADE ABOVE.

COMMISSION

○ MERCHANTS.

Southern Fruits and Vegetables a Specialty.

157 and 158 West Street. - NEW YORK.
The completion of the Macon & Northern Railroad between Macon and Athens has opened up for development one of the finest agricultural sections of Georgia. Especially is this section well adapted to truck farming and the culture of fruits and vegetables. Grapes and peaches of the finest flavor and most delicate nature are raised successfully. With proper care and judicious management there is no section of the South to-day that affords a more inviting field to the prospector. Lands can now be bought at low prices. The husbandry is made of quiet, law-abiding citizens who throw their arms out to welcome all new comers. The climate is exhilarating. Winters are mild and Summers cool. Laborers can work the entire year.

In the matter of transporting the crops, points between Macon and Athens are better situated than points further South. On Eastern shipments the Macon & Northern connects at Athens with the Richmond & Danville and the Seaboard Air Line. At Macon with the Central of Georgia and the East Tennessee, Virginia & Georgia systems, and at Madison with the Georgia Railroad for all Western points.

As regards truck farming, the following markets are at your door, viz.: Macon, Atlanta, Augusta, Athens, Savannah, Brunswick, Charleston and intermediate points. These points depend upon East Tennessee for their products. There is no reason why, with the climate and the cheapness of lands, penetrated by the Macon & Northern Railroad, they cannot be supplied nearer home. Protection in freight rates is guaranteed by the Macon & Northern Railroad to all who locate upon the line.

FRUIT FARMS

There is no section in the Union that, within the same distance, can produce so perfectly as great a variety of fruits as the 285 miles of territory traversed by the Georgia Southern & Florida Railroad

Beginning in the high red lands of Middle Georgia, producing all the fruits of the temperate zone, it ends amid the orange groves of Florida. This is no idle boast, for within the past three years its reputation as a fruit-growing section has attracted the attention of the most experienced growers in the Northern States, who have invested thousands of dollars, and who have planted hundreds of thousands of trees. The surety of crops, the earliness of ripening and the nearness to the great markets give this section advantages which is fast making it a formidable competitor to California. The Georgia melon has become a household word all over the Northern States and Canada; the Georgia peach has captured the markets of Boston, New York and Philadelphia, and in a few years will be found in every town from the Atlantic to the Rocky Mountains; the Georgia grape brings the highest price in the market, and the Florida orange has no equal.

The territory traversed by the Georgia Southern & Florida possesses peculiar advantages for peach growing. Not only does it run for thirty miles through Houston County, known as the great Peach Belt, but it follows southward the ridge which sheds the waters of the Gulf by the Flint river on the west and to the Atlantic by the Ocmulgee on the east for a distance of 150 miles.

In this section the frosts rarely injure the peaches, and they mature about one month earlier than in California. When it is remembered that the earliest peaches secure the highest prices it can be seen that even a few days' advance in the ripening is worth many dollars to the grower.

Along this line of road there grow to perfection Apples, Pears, Peaches, Plums, Grapes, Quinces, Oranges, Lemons, Olives, Apricots, Pomegranates, Figs, Strawberries, Blackberries and Melons. The climate and soil both favor the production of fruits of the finest form, flavor and color.

$5 to $20 PER ACRE.

- Monroe, N. C.
- Chester, S. C.
- Elberton, Ga.

The country tributary to the lines of the *Seaboard Air Line* system is not surpassed in America for

**General Farming,** **Stock Raising,** **Fruit Growing,** **Truck Gardening.**

In its adaptability for early Fruits and Vegetables, this section is pre-eminent in soil, climate, nearness to Northern markets and facilities for rapid transportation. Within the last few years many thousands of dollars have been invested by Northern settlers in orchards and vineyards in the vicinity of Southern Pines, N. C., a locality that is gaining a wide repute, not only as a fruit and vegetable region, but as a health resort also.

Land can be bought in any part of this territory at low prices and on easy terms.

The *Seaboard Air Line* will make special and exceedingly favorable rates for Settlers, Homeseekers and Bona-Fide Prospectors, and every possible attention, aid and facility will be extended by the Company's officers and agents.

Passengers to or from the North and East, by the Seaboard Air Line, connect in Washington, D. C., with THE ATLANTA SPECIAL, a fast train composed of Pullman Vestibuled Day Coaches and Sleepers, running solid between Washington, D. C., and Atlanta, Ga. Close connection is made with A. & W. P. R. R. for Montgomery, Mobile, New Orleans and all points South and Southwest. The Freight Service of this line is unsurpassed in either speed or regularity. Only sixty-eight (68) hours from New York to Atlanta.
